

**CS39N**  
**The Beauty and Joy of Computing**

**Lecture #7**  
**Applications That Changed The World**

**2009-10-05**

**UC Berkeley**  
**Computer Science**  
**Lecturer SOE**  
**Dan Garcia**

**INTEL TO REPLACE COPPER WIRES**

We've all heard of "Fiber Optic" cables, using photons instead of electrons to transport data. That's great for long distances, but copper wiring is still used for short distances. Intel hopes to change that with its prototype "Light Peak" cables, which will be lighter & cheaper with higher bandwidth.

[technologyreview.com/computing/23523/](http://technologyreview.com/computing/23523/)

**Lecture Overview**

- **What counts?**
- **For each application**
  - Historical context
    - What world was like before
    - On what shoulders does it stand?
  - Key players
    - Sometimes origins fuzzy
  - How it changed world
- **Summary**

www.greatachievements.org

**Applications that Changed the World**

- **Lots of applications changed the world**
  - Electricity, Radio, TV, Cars, Planes, AC, ...
- **We'll focus on those utilizing Computing**
- **Important to consider historical apps**
  - Too easy to focus on recent N years!

www.computerhistory.org/timeline

**The Computer (1940s)**

- **Early Inventions**
  - Bell Labs' CNC '39
  - Konrad Zuse's Z3 '41
  - Harvard's Mark-1 '44
  - Eckert & Mauchly's ENIAC '46
- **Early Theoreticians**
  - Shannon's theories
  - Turing's computability, AI
- **History : entire museum**
  - Lots of incremental progress
  - Early ones size of house
- **Everything today owes its success to this**

© 2009 UC Berkeley CS39N "The Beauty and Joy of Computing": Applications That Changed the World (4)

en.wikipedia.org/wiki/History\_of\_the\_transistor

**The Transistor ("born" 1947-12-23)**

- **Semiconductor device to amplify or switch signals**
  - Key component in ALL modern electronics
- **Who?**
  - John Bardeen, William Shockley, Walter Brattain
- **Before that?**
  - Vacuum Tubes
- **After that?**
  - Integrated circuit, microprocessor

*important invention of the 20th Century" - Ira Flatow, Transistorized! (PBS Special)*

www.computerhistory.org/internet\_history

**The Internet (1962)**

- **Founders**
  - JCR Licklider, as head of ARPA, writes on "intergalactic network"
  - 1963 : ASCII becomes first universal computer standard
  - 1969 : Defense Advanced Research Projects Agency (DARPA) deploys 4 "nodes" @ UCLA, SRI, Utah, & UCSB
  - 1973 Robert Kahn & Vint Cerf invent TCP, now part of the Internet Protocol Suite
- **Internet growth rates**
  - Exponential since start!

© 2009 UC Berkeley CS39N "The Beauty and Joy of Computing": Applications That Changed the World (6)

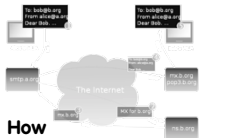

en.wikipedia.org/wiki/Email

## Email (1965)

- Fundamentally changed the way people interact!
- 1965: MIT's CTSS
  - Compatible Time-Sharing Sys
- Exchange of digital info
  - Model: "Store and Forward"
  - "Push" technology
- Pros
  - Solves logistics (where) & synchronization (when)
- Cons
  - "Email Fatigue"
  - Information Overload
  - Loss of Context

**How**

- Alice composes email to bob@b.org
- Domain Name System looks up where b.org is
- DNS server with the mail exchange server for b.org
- Mail is sent to mx.b.org
- Bob reads email from there

UC Berkeley CS39N "The Beauty and Joy of Computing": Applications that Changed the World (7)

www.greatachievements.org/?id=3989 www.blinkenlights.com/pc.shtml

## The Personal Computer (1970s)

- First PCs sold as kits to hobbyists
  - Altair 8800 (1975)
- Early mass-prod PCs
  - Apple I, II (Jobs & Woz)
  - Commodore PET
  - IBM ran away w/market
- Microprocessor key
- Laptops → portability
- Created industry, wealth
  - Silicon Valley!
  - Bill Gates worth \$50 Billion

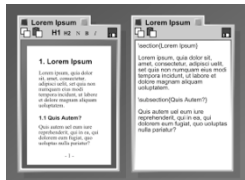

en.wikipedia.org/wiki/Personal\_computer

UC Berkeley CS39N "The Beauty and Joy of Computing": Applications that Changed the World (8)

en.wikipedia.org/wiki/{Wysiwyg, WIMP (computing)}

## WIMP, WYSIWYG Interface (1973)

- WIMP: Window, Icon, Menu/Mouse, Pointer
  - Dominant style of Human-Computer Interaction (HCI)
  - Contrast with a command-line interface it replaced
  - Both developed at Xerox PARC 1973, popularized by Apple's Mac computers 1984
- WYSIWYG: What You See Is What You Get
  - Display shows printed result
  - Before this, commands →
  - Even today, both WYSIWYG and non- available

*The program on the left uses a WYSIWYG editor to produce a document. The program on the right contains LaTeX code, which when compiled will produce a document that will look very similar to the document on the left.*

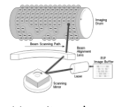

UC Berkeley CS39N "The Beauty and Joy of Computing": Applications that Changed the World (9)

en.wikipedia.org/wiki/Laser\_printer

## The Laser Printer ('69), Postscript ('82)

- Gary Starkweather @ Xerox invented it
  - Modified an existing Xerox
  - Laser beam projects image onto electrically charged rotating drum
- Picture is commands!
  - John Warnock, founder of Adobe, invented Postscript!
  - Turing-complete language!
  - The processor on the printer rasterized the image
    - Commands → Image bits on/off
- Professional-quality output in hands of people

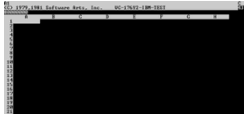

UC Berkeley CS39N "The Beauty and Joy of Computing": Applications that Changed the World (10)

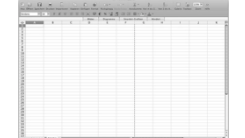

en.wikipedia.org/wiki/Spreadsheet

## The Spreadsheet (1961, 1980)

- Grid of rows and columns, with each cell a formula or data
  - Simulates a paper worksheet
  - Commonly used for financial information (& grades!)
- History
  - Richard Mattessich 1961 paper
    - "Budgeting Models & System Simulation"
  - VisiCalc (by Dan Bricklin) helped drive the sales of Apple II ~1980
  - Lotus 1-2-3 with DOS in 1981
  - Excel the current market leader
- Now online (Google Docs)

VisiCalc, the first PC spreadsheet (1970s)

Microsoft Excel (2008)

UC Berkeley CS39N "The Beauty and Joy of Computing": Applications that Changed the World (11)

en.wikipedia.org/wiki/Videoconferencing

## Audio/Videoconferencing (1980s)

- History
  - 1936 : closed-circuit TV
  - 1968 : Englebart's "Mother of All Demos"
  - 1980s : Digital Telephony (via ISDN)
  - 1990s : Internet Protocol (IP) based videoconferencing
- Impact
  - For some businesses, essential (e.g., Dreamworks)
  - Big with grandparents, sign language communication
  - Telemedicine
  - Education impact huge

First demo of videoconferencing in 1968

T3 ultra-high resolution telepresence

UC Berkeley CS39N "The Beauty and Joy of Computing": Applications that Changed the World (12)

en.wikipedia.org/wiki/History\_of\_the\_World\_Wide\_Web

## The World Wide Web (1989)

- “System of interlinked hypertext documents on the Internet”
- History**
  - 1945: Vannevar Bush describes hypertext system called “memex” in article
  - 1989: Tim Berners-Lee proposes, gets system up ‘90
  - ~2000 Dot-com entrepreneurs rushed in, 2001 bubble burst
- Wayback Machine**
  - Snapshots of web over time
- Today : Access anywhere!**

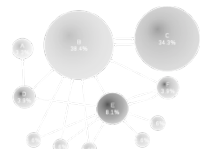

UC Berkeley CS39N “The Beauty and Joy of Computing” : Applications that Changed the World (3)

en.wikipedia.org/wiki/History\_of\_the\_web\_browser

## WWW Search & Browser (1993)

- Browser**
  - Marc L. Andreessen and Eric J. Bina @ NCSA create Mosaic, 1<sup>st</sup> popular WWW browser
    - First Internet “Killer App”
    - Later: Netscape Navigator
  - Now IE (68%), Firefox (22%)
- Search**
  - Before engines, there was a complete list of all servers!
  - 1993 Martijn Koster Aliweb is 1<sup>st</sup> web search engine
  - 1997 Stanford Sergey Brin and Larry Page develop Google’s search, based on PageRank (each: \$12 Billion)

UC Berkeley CS39N “The Beauty and Joy of Computing” : Applications that Changed the World (4)

en.wikipedia.org/wiki/Web\_2.0

## Web 2.0 : The Social Network (2004)

- “...web development & design that facilitates interactive information sharing, interoperability, user-centered design and collaboration on WWW”
  - Users change content via “architecture of participation”
- Examples**
  - Web communities, apps, social networks, video & photo sharing, wikis, blogs, tweets, ...
- “Take back the web!”**

“You” – Time’s 2006 Person of the Year

UC Berkeley CS39N “The Beauty and Joy of Computing” : Applications that Changed the World (5)

en.wikipedia.org/wiki/{Web\_mapping, Gps}

## Web Mapping (1993)

- “Designing, implementing, generating and delivering maps on the WWW”**
- Advantages**
  - Mobile computing + GPS means you’re never lost again!
  - Real-time traffic!!
  - Collaborative maps have lots of potential (E.g., WikiMapia)
  - Street view can allow you to see what it looks like on the ground
  - Can have hyperlinking, yet another way to connect to web
  - Can layer content, many uses!

Different views of this classroom

UC Berkeley CS39N “The Beauty and Joy of Computing” : Applications that Changed the World (6)

en.wikipedia.org/wiki/Google\_Docs

## Google Docs, SW as a Service (2006)

- Free, web-based word processor, spreadsheet, presentation and form application**
- Single source of truth!**
- Fundamentally changing the way people collaboratively author documents**
  - No more attachments and versions!
  - Much better than Wikis, which are not WYSIWYG, so folks grab local temp copy

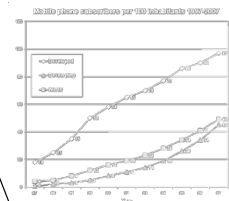

UC Berkeley CS39N “The Beauty and Joy of Computing” : Applications that Changed the World (7)

en.wikipedia.org/wiki/{Personal\_digital\_assistant, Mobile\_phone, Texting}

## The Mobile Phone, PDA & Texting

- History of Cell Phones**
  - 1908: Nathan Stubblefield patents wireless telephone
  - 1945: 0G introduced
  - 1983: Motorola DynaTAC 1<sup>st</sup> FCC-approved phone
- PDA: handheld computer**
  - 1983: First PDA (Casio)
  - Phones became “smart”
- Texting (short messages)**
  - Most popular mobile service
  - Has affected language...gr8!

UC Berkeley CS39N “The Beauty and Joy of Computing” : Applications that Changed the World (8)

## Summary

- **How many of the 21<sup>st</sup> cent engineering achievements are happening today?**

- **What's the next big thing?**

- Natural language processing?
- 3D displays?
- Robotics? Self-driving cars?
- Optical or quantum computing?
- Personal air vehicle?
- Space travel?
- Computer displays in glasses?
- Flexible displays?
- Brain machine interfaces?
- Energy!
