University of California, Berkeley — Spring 2008
College of Engineering — **SP'08 Survey Form** — Anthony D. Joseph
Computer Science Division – EECS — CS162 Operating Systems

TA Name (optional):	

The purpose of this feedback is to help the TAs and instructors do a better job this semester and to improve CS 162 for future semesters. It is completely anonymous. You may also submit anonymous comments on the course web site at: http://www-inst.eecs.berkeley.edu/~cs162/sp08/comments.html. Use additional paper if necessary.

1. Do you like this class? If not, why not?

2. Do you like the lecture format? If not, what format would you prefer (for example, chalkboard)?

3. Do you feel you have become significantly more informed about operating systems?

4. Have you visited the professor in office hours? Any of the TAs?

5. Did you feel the midterm exam was fair and reasonably covered the material discussed in class and in the book so far?

6. Have you found the webcast or podcast to be useful for the course? Do you watch the webcast or listen to the podcast instead of attending lectures?

7. Constructive criticism for TAs to help them do their jobs better: please list the TAs you have interacted with, and list what they do best and what you would like them to change.

8. Constructive criticism for the professor: Any suggestions or comments are welcome.

Suggestions for improving CS162: Any suggestions or comments are welcome, especially if they can be implemented this semester.
