Homework Assignment #1
Due in the 105 box on the 2nd floor, 5 PM 1/24/2011

Problem 1
For each of the sixteen chapters in the textbook, find a figure or example in the chapter and write down:
Chapter number, chapter title, figure/example number, and one sentence describing what you found interesting about the figure.

Problem 2
Go to digikey.com or mouser.com and find an interesting diode that you would like to test. Send an email to pister@eecs with the subject “ee105 hw1” and include the vendor and part number in the body of the message.
Ex: mouser BAP50-02,115
or
digikey 1N5225B-TPTR-ND

Your diode must be under $5 (unless you find a really cool one and get permission).
Note: consider that you *will* be testing these diodes, so try to find something with through-hole leads if you can.
