

## Week 3 Student Checklist

- Review the overall Process Flow.

This can be found in bcourse: Files —> Lab Materials —> Overall Fabrication Process Flow [Current Semester].pdf

- Read the detailed Process Flow for week 4: Gate Oxidation: 800A: You should have a good understanding of the furnace process. This week will give you a practical experience of Thermal Oxidation (Dry oxidation) process.

This can be found in bcourse: Files —> Lab Materials —> EE143 NMOSProcessFlow.[Current Semester].pdf

- Read the manual for Four Point Probe.

The manual is available in bcourse: Files —> Lab Materials —> “Lab References”

- Read the measurement checklist for week 3. Make sure you get the data during the lab. You will need the data for your lab report.
