Homework 0: Survey
Due Sept 9th, 11:10 AM (you can type the answers and attach)

1. Help us get to know you better by telling us your background and why you are (considering) taking this class:

2. List anything you like to see covered in this course in particular:

3. How would you define an embedded system before you took the class?

4. Any changes to your definition after first 2 weeks?

5. Pick an embedded system and describe its application:
   a. List different parts in the system:
   b. Design Methodology used
   c. Would you do anything differently?
