Registering the COOLSCAN IV ED with Windows 2000

Before beginning device registration, confirm that:

- you have installed Nikon Scan 3.1 as instructed in the Nikon Scan Software Manual
- the Nikon Scan 3.1 CD is inserted in the CD-ROM drive

14-1 The first time the scanner is connected, Windows will display a message stating that new hardware has been detected.

14-2 After a short pause, the message will be replaced by the opening dialog for the Windows hardware wizard. Click **Next**.

14-3 A dialog will be displayed asking whether you want to search for a driver or select one from a list. Be sure that the Nikon Scan 3.1 CD is inserted in the CD-ROM drive. If the CD is not in the CD-ROM drive, insert the disk while holding down the shift key to prevent the Nikon Scan installer from starting automatically.

14-4 Select the search option and click **Next**.

14-5 You will be prompted to choose the location of the driver files. Select **CD-ROM drives** and click **Next**.

When you insert the Nikon Scan 3.1 CD into the CD-ROM drive, the installer Welcome program may start automatically. Click **Exit** to exit the Welcome program.
14.6 The dialog shown at right will be displayed once Windows has located the information it needs to register the scanner. Click Next.

14.7 The dialog shown at right will be displayed. Click Yes.

14.8 The dialog shown at right will be displayed while Windows registers the scanner.

14.9 A dialog will be displayed announcing that registration is complete. Click Finish.

14.10 The dialog shown at right may be displayed; click Yes to restart your computer.
Step 15—Confirm device registration
After completing device registration, check that the Windows device drivers are installed and functioning normally.

15-1 Make sure that your scanner is connected to your computer and turned on.

15-2 From the Start menu, select Settings > Control Panel. Double-click the System icon in the window that appears.

15-3 The System Properties dialog will be displayed. Open the Hardware tab and click the Device Manager… button.

15-4 Your Nikon Scanner should be listed as an imaging device. If an “Imaging devices” item appears, click the “+” mark next to the item to view a list of imaging devices.

15-5 Double-click the listing for your scanner. If your scanner is not listed as an imaging device, proceed to “Updating the Device Driver.”

15-6 The properties window for your scanner will be displayed. If “This device is working properly” appears under “Device status” in the General tab, the device driver for your scanner is installed and functioning normally. Click here to return to the Nikon Scan Software Manual. If a message such as, “The drivers for this device are not installed” appears, proceed to “Updating the Device Driver.”
Updating the Device Driver

A-1 Open the Device Manager as instructed in steps 15-1 to 15-3.

A-2 If your scanner is listed under “Unknown devices” or “Other devices,” or appears next to a “?” “!” or “x,” double-click the scanner icon to open the properties window for the device.

A-3 Open the Driver tab and click Update Driver….

A-4 The Welcome to the Upgrade Device Driver Wizard dialog will appear. Click Next.

A-5 Select Search for a suitable driver for my device (recommended) and click Next.

A-6 With the shift key held down to prevent the installer from starting automatically, insert the Nikon Scan 3.1 CD into a CD-ROM drive. Follow the instructions in steps 14-5 to 14-8 to specify the location of the device driver.

A-7 When a message is displayed indicating that driver installation is complete, click Finish to exit the wizard. If you are prompted to restart your computer, click Yes to restart Windows.

Click here to return to the Nikon Scan Software Manual.

When you insert the Nikon Scan 3.1 CD into the CD-ROM drive, the installer Welcome program may start automatically. Click Exit to exit the Welcome program.
