

61A Extra Lecture 9

Announcements

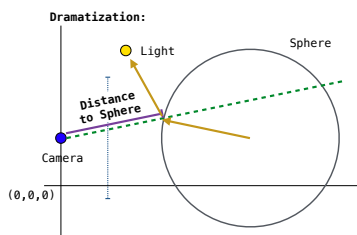

Pixels

(Demo)

Ray Tracing

Ray Tracing

A technique for displaying a 3D scene on a 2D screen by tracing a path through every pixel

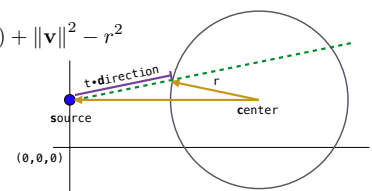

Distance from a Source to a Sphere

$$r^2 = \|\mathbf{s} - \mathbf{c}\| + t\mathbf{d}\|^2$$

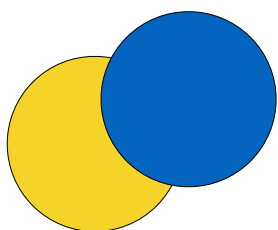

$$0 = \|\mathbf{t}\mathbf{d} + \mathbf{v}\|^2 - r^2$$

$$0 = t^2 \|\mathbf{d}\|^2 + 2t(\mathbf{v} \cdot \mathbf{d}) + \|\mathbf{v}\|^2 - r^2$$

(Demo)

Multiple Spheres

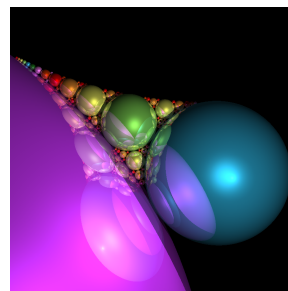

Compute distance to each sphere

Pixel color from the closest sphere

(Demo)

Reflections

Color is a mixture of the sphere & reflection

The source of a reflection is the surface of the sphere, instead of the original camera

(Demo)
