Course miscellany

Our course control number is 27235. This is a 1-unit course.

We'll meet in 405 Soda from 11 to 12:30 on Tuesdays for the first ten weeks of the semester. A signup list will be passed around each week during class. Class will consist of presentations by a variety of speakers and discussions among the 301 participants. There will be a few short homework assignments, involving activities such as visiting and evaluating a fellow t.a. and designing a lesson plan for an alternative teaching method. You will also be videotaped later in the semester; Clint Ryan, the 301 GSI, will review the tape with you.

EE 301, a version of this course for t.a.s in electrical engineering, meets Tuesdays 5-6:30pm in 299 Cory. Pravin Varaiya is the instructor. T.a.s for EECS 150 will probably benefit more from the EE section.

My goals

Good teaching seems to result from some combination of planning, practice, and taking advantage of one's strengths. In this course, I hope to expose you to some alternatives for running a class that you may not have thought of, and alert you to things for which you may wish to plan. I hope also that you will benefit from feedback from fellow 301 participants within 301 itself and in the classes you run.
