

EE 232 Project Rubric

Spring 2017

This rubric gives an idea of what we are looking for in the final project.

Points:	0	7	10
Originality	Project copies an existing work without performing own analysis	Project is able to replicate results in an existing paper	Project introduces a novel device or improves upon a published work
Analysis	Device description is given but no analysis is performed	Some analysis is given but assumptions or results not fully justified	All relevant device properties and figures of merit are thoroughly analyzed and justified
Simulation	No simulation is performed	Simulation of overly simplified device is performed	Simulation is used in an effective way to analyze the device. Device may be simplified within reasonable assumptions
